

## Press release

---

Paris – 24 June 2016

### **Indigo and the Argenteuil local authorities are returning 10 renovated car parks to local residents**

#### **The large-scale works are coming to an end and will bring about a new era of parking in the area, with parking spaces available for local residents in the town centre**

The Argenteuil local authorities entrusted the project to Indigo, the global market leader in parking and individual transport. The project consists of renovating and operating the 11 car parks in the town, representing approximately 4,400 parking spaces. To date, renovation works have been completed at 10 sites, including car parks that have been closed since the noughties: Cévennes, and La Frette since 15 June. The renovation programme will end with the commissioning of the Val d'Argent Sud car park, which is planned for the end of 2017.

Argenteuil local authorities have also delegated the operation of the 11 car parks to Indigo in a public service delegation contract for 15 years. Indigo led the car park renovation programme in close partnership with the town's service divisions, who wanted to provide their residents with clean car parking areas featuring the latest innovations, where users would feel comfortable and safe. Works on the three car parks to be rehabilitated, Cévennes, La Frette, and Val d'Argent Sud, will involve a total of 10,000 working hours, with each site requiring eight months of works.

#### **Renovation that's focused on safety, cleanliness, welcoming users, and innovations**

Indigo called on its entire skill set to modernise the car parks and provide a solution meeting the wishes of the local authorities and local residents, requiring large-scale works:

- Installation of fire detection systems and access controls
- Renovation or replacement of guardrails, fire doors, and ventilation grilles
- Construction of elevator shafts and stairwells
- Construction of ventilation shafts
- Installation of elevators and automatic doors
- Application of Indigo's charter on painting and signage to make it easier for users to find their way around

Indigo also placed particular emphasis on safety in the car parks by installing video surveillance and fire detection systems, which are connected to a local response centre in Argenteuil. The local response centre can remotely supervise site operations and complement the work of on-site agents through real-time contact with the ten car parks via alarms, video surveillance and an intercom system for contacting Indigo agents.

The ten car parks are also linked to the Centre National de Téléopération (CNTO - Indigo Customer Contact and Safety Centre) located at Indigo's head office in the La Défense area. It is a specialised centre for round-the-clock remote surveillance of the car parks and guarantees customer assistance at all times.

#### ***About Indigo***

Indigo is a French group employing 15,000 people in 14 countries and more than 500 cities. It is the only operator on the sector with a presence on three continents and on all parking segments: on-street, off-street and shared private car parks.

Indigo operates over 4,000 car parks in the world, with more than 2 million parking spaces, and over 2,500 kms of on-street spaces.

Indigo supports local authorities and private players (hospitals, shopping centres, railway stations, airports, etc.), and develops customised parking offerings for users while making the city more pleasant and fluid.

On a booming mobility market, forecast to be worth €100 billion by 2025, Indigo is a key player in the mobility of the future.

Infra Park S.A.S (formerly Infra Foch) holds nearly 100 % of the share capital of Indigo Infra S.A (formerly VINCI Park) and 100 % of the share capital of Infra Park Digital S.A.S.

Infra Park is indirectly owned in proportions of almost 37 % by an investment fund managed by Ardian, almost 37 % by Crédit Agricole Assurances and just under 25 % by VINCI Concessions (VINCI Group), with group management holding the remainder.

INDIGO. Space for the future
